

**Telehealth is now an option for our patients and we are here and ready to take appointments.**

Through a smartphone, iPad, laptop, or computer we can see our patients from the safety of their home.

We encourage our patients to not delay their vascular care as this could be life or limb threatening. Telehealth is helping us to stay engaged and triage the urgency of needs while allowing our patients to remain in the safety of their homes.

Please call us at 770-423-0595 to book your Telehealth appointment.
